PROFESSIONAL SUMMARY

BCA graduate specialising in AI & ML with a proven ability to build production-grade AI systems and full-stack web applications.. Demonstrated technical expertise in delivering OCR-based prescription verification (~85% accuracy) and CNN classifiers (90%+ accuracy) using Python, Django, TensorFlow, and YOLO. Certified in AI & ML, highly adaptable, and available to join immediately in Kochi.

CORE SKILLS

Languages: Python, JavaScript, C, C++, Java

AI / ML / CV: Deep Learning, CNNs, NLP, Computer Vision, TensorFlow, Keras, EasyOCR, YOLOv5/v8

Backend & DB: Django, PHP, REST API, CRUD Operations, MySQL, SQL, Relational Schema Design

Frontend & Tools: HTML5, CSS3, Bootstrap, Responsive Design, Git, Data Structures & Algorithms, OOP

PROJECTS

Prescription Verification System

Tech Stack: Python, Django, EasyOCR, NLP, REST API, MySQL

- Built a full-stack Django application integrated with a REST API to automate handwritten prescription verification, achieving ~85% OCR accuracy and reducing manual verification effort by ~60%.
- Designed a normalised MySQL database schema for efficient drug cross-referencing and implemented comprehensive unit and integration testing throughout the development lifecycle.

Pet Care Management System

Tech Stack: PHP, MySQL, HTML5, CSS3, JavaScript

- Developed a responsive, multi-module web application for managing pet records and scheduling appointments.
- Implemented complete CRUD operations, client-side JavaScript validation, and structured the backend using a 5-table normalised schema.

Cat vs Dog Image Classifier

Tech Stack: Python, CNN, TensorFlow / Keras

- Trained a Convolutional Neural Network (CNN) on a dataset of over 10,000 images, utilising data augmentation and dropout techniques to achieve 90%+ test accuracy.
- Packaged the trained deep learning model as a scalable REST API to allow seamless web application integration.

Object Detection using YOLO

Tech Stack: Python, YOLOv5 / v8

- Fine-tuned state-of-the-art YOLOv5 and YOLOv8 models on custom datasets for specialised object detection tasks.
- Deployed real-time object detection systems featuring bounding-box overlays tailored for automated tracking and surveillance use cases.

E-Commerce Storefront | MERN Stack

- Built a full-stack E-Commerce Storefront using the MERN stack, featuring JWT-based authentication, RESTful CRUD APIs for products/users, and a responsive React frontend with dynamic product listings

EDUCATION

Bachelor of Computer Applications (BCA) – AI & ML Specialisation

2023 – 2026

Mahatma Gandhi University – Jai Bharath Arts and Science College, Perumbavoor, Kerala | CGPA: 7.60

Higher Secondary Certificate (12th – Plus Two)

2022 – 2023

EMEAHSS, Kondotty, Malappuram – Kerala State Board | Percentage: 83%

CERTIFICATIONS & ADDITIONAL INFORMATION

Certifications: Add-On Course in AI & ML (Jai Bharath College, 2023-26) | Python for Data Science (NPTEL/Coursera – In Progress)

Languages: English (Professional) | Malayalam (Native)

Preferences: Immediate Joiner | Preferred Location: Kochi, Bangalore (In-Person / Remote / Hybrid)

Open To: Internship, Full-Time, and Remote roles across AI/ML, Python Dev, and Software Engineering
